OUR DUR ANY CHAILENGE.

OUR WX TEAM

The five specialists from the Weller WX Team will solve all your problems to do with soldering, desoldering and the use of hot-air in your manufacturing process. The entire WX team offers full WX tool compatibility, tried-and-tested benchtop functions and all essential traceability features.

Multifunctional USB port Firmware updates and registration are quick and easy using USB sticks. User-friendly PC interface.

Safe manual soldering

tool-specific temperature settings.

Weller WX stations make the manual soldering process safer, a

Use as benchtop controller

back their parameters and status to the display.

Intelligent tool detection

Integrated USB ports allow WX stations to be connected to

and to control soldering fume extractors, pre-heat plates and

programmable logic controllers (PLC). The connected tools feed

All connected tools and accessories are detected automatically

by the stations and their name(s) shown on the display.

crucial factor in the automobile, aerospace and medical technology

industries. This is guaranteed by temperature and tool locking, and

Integrated parameter memory

Parameters such as standby temperatures and automatic switch-off time can easily be stored in the soldering iron. Parameters only need to be stored once; the soldering iron can then use them with any WX station.

Maximum safety, maximum flexibility A unique equipotential bonding connection is provided free of charge.The jack sleeve has 4 possible settings: hard earthed, equipotential bonding, floating and soft earthed.

ESD safe All WX devices are ESD-safe and can be used in EPA regions.

Huge energy savings Usage sensor

Thanks to an integrated sensor, WX tools are motion activated. This means that they consume power only when they are actually in use. Connected accessories a lso go into standby mode.

Traceability

TRACEability

Extremely short learning curve

Multi-language menu guide: German, English, French, Italian, Spanish, Portuguese and Mandarin. Other languages can be implemented on request.

Robot output A digital, optically decoupled robot connection comes as standard.

WX SOLDERING STATIO A new era of soldering.

WX 1

Weller wxp 12

TWO STATIONS - MANY ADVANTAGES

380

The powerful, user-friendly WX 1 and WX 2 Soldering stations have redefined the world of soldering. Maximum process reliability for manual soldering tasks is guaranteed for the automobile, aerospace and medical technology industries. Any soldering process can be programmed easily using these intelligent tools, and a unique level of dependability assured. Whatever technique is used, these devices are intuitive and easy to operate thanks to their touch screens and language options. There is a choice between 1-channel and 2-channel stations.

Weller

LAURA & SAM **The Mighty Twins**

Laura and Sam are the founding members and reliable service providers in the WX Team. Their outstanding performance, unique appeal and intuitive handling have largely defined the WX Character.

OUR WX TEAM

Δ

NS

ADVANTAGES AT A GLANCE

Visual process control through LED signal function Blue LED ring light (light is out = Off, light is blinking = Standby or Heating Up, light is on = tip ready for use)

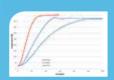

Tailor-made performance Weller heating technologies deliver precise performance on demand.

WX soldering irons heat in ultra-quick time and can be used

Temperature stability/accuracy

All WX Soldering tools have a temperature stability of \pm 2° C

and a temperature accuracy of $\pm 9^{\circ}$ C, as per IPC standard.

±2°C

Intuitive operation

Quick heating time

immediately.

The robust touch screen is a capacitive touch panel made of real glass. It is anti-static and temperature-resistant. The turm-and-click wheel with confirm button allows intuitive operation.

Huge energy savings Motion sensor

Thanks to an integrated sensor, WX tools are motion activated. This means that they consume power only when they are actually in use. Connected accessories also go into standby mode.

DAVE The vacuum man

Nothing stays around long when Dave's on the job. He clears the area in no time and leaves the surface ready for new jobs. All by himself!

WXD 2 DESOLDERING

Remove solder with the fastest desoldering irons in the world.

Weller WXDP 120

THIS DESOLDERING SYSTEM IS IN A LEAGUE OF ITS OWN!

With the 2-channel soldering station and WXD 2 Desoldering station, plus the high-power WXPD 120 Desoldering iron, you can tackle jobs you hardly thought possible. With a heating time of 35 seconds, the WXDP 120 Desoldering iron sets new standards for high-performance soldering and desoldering.

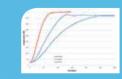

STATION

ADVANTAGES AT A GLANCE

External compressed air supply

The maintenance-free Venturi unit produces a constant vacuum via an external compressed air supply. A separate compressed air supply is needed.

Fastest desoldering iron

With its 120 Watts and extremely short heating time, the desoldering iron can easily handle jobs that would have been difficult in the past, including desoldering high mass PCBs.

No tedious cleaning The new, extended nozzle shaft prevents the suction tube sticking.

Since the suction channel has also been replaced, the once tedious and time-consuming task of cleaning the tool is now a thing of the past.

Thanks to ingenious mountings, the suction nozzle and solder cartridge can be changed quickly and easily – without the risk of

Huge cost savings

Quick replacement

burning or tricky replacement work.

The relatively low operating temperature (380°C) and automatic standby mode controlled by the use sensor increase the service life of the suction nozzles by a factor of 3.

User-friendly handling

An ergonomically-shaped Softgrip handle with integrated finger switch makes for efficient operation. The short distance between the solder cartridge and the Softgrip handle prevents the tool from twisting while held in the hand.

Vacuum run-on A vacuum run-on time can be set to prevent the suction pump

blocking.

2 models are available. The WXDP 120 is designed for horizontal operation and the WXDV 120 for vertical operation.

ALEX HIS AIRNESS

The elegant player in the WX Team is "His Airness". He gently handles the finest jobs but is also extremely forceful when necessary. He moves between these extremes with ultimate ease. A real grandee in the team!

OUR WX TEAM

WXA 2 HOT-AIR STATIO

The perfect solution for hot-air and soldering jobs.

HOT-AIR AND SOLDERING IN A SINGLE STATION.

Clear handling advantages and tangible cost savings in one unit. That's what you get with the WXA 2 hot-air station. Ideal for complex hot-air jobs or traditional soldering. The hot-air amount (20 I/min, at 6 bar) is infinitely adjustable. And of course the entire range of high-performance hot-air and soldering accessories is compatible with this station.

Ν

ADVANTAGES AT A GLANCE

Adjustable air amount

The amount of air can be controlled using the rotary knob. An external compressed air supply is needed. The amount of air is displayed in percent.

Adjustable operating mode

The unit has 3 separate operating modes. **Operating mode level 1** – the air flow continues for as long as the button on the hot-air iron or foot switch is pressed. **Operating mode level 2** – if the button is pressed once, the hot-air flow continues for between 0 and 300 seconds, stopping at the end of the set time.

Operating mode level 3 – the WXHAP 200 switches on with one press of the button and off with the second press.

Finger and foot switches

The air flow is controlled using the finger switch in the handle. It can also be controlled by a foot switch (optional).

Maximum flexibility

The comprehensive nozzle selection makes the WXHAP 200 Hot-air soldering pencil suitable for a wide range of applications. Flat and round nozzles, dual and quad nozzles.

<u>lon tr</u>ap

All WX devices are ESD-safe and can be used in EPA regions. The ion trap in the iron ensures that the emerging hot-air is free of static electricity.

Inert gas operation

An inert gas (nitrogen) can also be used for challenging soldering jobs to generate the hot-air.

Weh

WXR 3 REWORK STATION

-1-1

-2-

-3-

The WXR 3 Rework station is the perfect solution for all soldering, desoldering and hot-air jobs. The WXR 3 can handle the most demanding tasks but is also ideal for standard jobs. All units can cope with major manufacturing tasks quickly and surely thanks to their straight-forward settings. The station can also be integrated into a traceability process.

ADVANTAGES AT A GLANCE

600 Watts – unique

The WXR 3 is a 3-channel station with a total output of 600 W. The multifunctional WXR 3 is suitable for all applications, and can take all WX Tools.

2 integrated pumps (self-contained) 2 integrated pumps make the system independent of a separate compressed air supply. A high-performance pump for vacuum and

hot-air, and a separate vacuum pump for pick-up tools.

The LCD display shows all connected tools. Special functions can

Intelligent, programmable desoldering iron
 For use horizontally
 35 sec. heat up time and set-back-function
 Push and Pull Technology ¹⁾

WXDP 120 Desoldering iron set 120 W, with excenter fixture, with WDH 70 Safety rest and PDN Plier Desoldering Nozzle

The fastest desoldering iron, reaching operating temperature in 35 seconds, it makes the most difficult desoldering challenge easy. Integrated solder collector – for horizontal handling. 120 W | 24 V | Max. temperature 450°C | Order no. T005 13 202 99

¹⁾ Push and Pull Technology: easy change of the tin collector by pliers for desoldering nozzle PDN

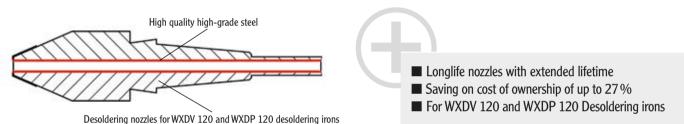

WXDV 120 Desoldering iron set 120 W, with excenter fixture, with WDH 40 Safety rest and PDN Pliers Desoldering Nozzle

The fastest inline desoldering iron, reaching operating temperature in 35 seconds, it makes the most difficult desoldering challenge easy. Integrated solder collector – for vertical handling. 120 W | 24 V | Max. temperature 450°C | Order no. T005 13 205 99

¹⁾ Push and Pull Technology: easy change of the tin collector by plier for desoldering nozzle PDN

XDSL Series desoldering nozzles

The new XDSL series desoldering nozzles have an integrated steel tube which reduces cost of ownershin

The new XDSL series desoldering nozzles have an integrated steel tube which reduces cost of ownership. A high grade stainless steel tube is located inside the nozzle to prevent the erosion of the nozzle's copper body by molten solder and flux. This system results in a longer lifetime than with standard nozzles.

WX Compatible heating plates

WHP 1000

Preheating plate 1000 W | 230 V Heated surface area: 220 x 150 mm Order no. T005 33 648 99

WHP 3000, 600 W

Infrared preheating plate 600 W | 230 V With Easy-Fix-circuit board holder Heated surface area: 120 x 190 mm

WHP 3000, 1200 W

Infrared preheating plate 1200 W | 230 V With Easy-Fix-circuit board holder Heated surface area: 190 x 245 mm

Order no. T005 33 386 99

Order no. T005 33 646 99

WX Compatible heating plate

&

WXHP 120

Preheating plate 120 W | 24 V Heated surface area: 80 x 50 mm Order no. T005 27 029 99

WX Compatible soldering bath

WXSB 200

Soldering bath 200 W | 24 V Soldering bath size: 58 x 33 x 19 mm Order no. T005 27 043 99

WX Adapter / Accessories

	WX Adapter for PC	Order no. T005 87 647 11
7	WX Adapter for Zero Smog	Order no. T005 87 647 12
1	WX Connection cable, 2 m	Order no. T005 87 647 10
7	WX HUB for control of Zero Smog	Order no. T005 87 647 26
	WFV 60A Automatic butterfly valve	Order no. T005 87 627 46
2	Foot switch WXA WXD WXR	Order no. T005 87 647 46

-

WX Compatible for use in solder robots

HERX 120 Heating element

Heating element 120 W | for solder robot application with WX 1 / WX 2

Order no. T005 87 657 40

Cord for HERX 120

Cord for HERX 120 | 1.6 m

Order no. T005 87 657 15
